MEMORANDUM FOR RUU USERS

SUBJECT: Software Version Description (SVD) for Installation Support Module (ISM)
Record Update Utility (RUU) Interim Change Package (ICP) P05-A67-09-01-A

1. Enclosed is ICP P05-A67-09-01-A which provides a formal change to the Record Update Utility (RUU) ISM
2. Acknowledgement of installation of this ICP must be made IAW instructions provided in Enclosure 1.
3. This memorandum certifies that the ISM subject software has been thoroughly tested, is considered to be a quality product, and is hereby authorized for release to a production environment.
4. Security Implications: NONE.

i

1. Scope.

1.1 Identification. This Software Version Description (SVD) applies to the Record Update Utility (RUU) running on Army and networked AIX operating system on UNIX platforms.

1.2 System Overview. RUU is part of the ISM Project which is an army-wide Major Automated Information System (MAIS) initiative. The primary objective of ISM is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications which automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated Data Base (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The RUU software supports the personnel portion of demobilization. This may be utilized to perform the peacetime (garrison) Military Personnel (MILPER) functions that support In-Processing, Out-Processing and Transition Point Processing. It facilitates the preparation and administrative handling of records, forms, memos and orders and automation of required forms.

1.3 Document Overview. This document provides the instructions necessary for the implementation of the formal Interim Change Package (ICP) P05-A67-09-01-A of RUU. It informs the users of the changes made to the system and provides Point of Contacts (POCs) to be contacted in case of problems.

2. Referenced Documents.

2.1 Referenced Documents. This paragraph has been tailored out.

3. Version Description.

3.1 Inventory of Materials Released. This paragraph has been tailored out.

3.2 Inventory of Software Contents. Hardware platform - AIX OS users (installation supported). This change package contains the following files.

	P05-A67-09-01-A. SVD3. txt
PROGRAM	VERSION UPDATE
ruu_0901. cpio. Z 0900	23 Feb 2000
install_ruu_0901	23 Feb 2000
README. ruu_0901 0900	23 Feb 2000

1

3.3 Changes Installed.

3.3.1 Corrector Descriptions - Technical.

1. ECP-S/E P05-S600-001
 - A. CYCLES: None
 - B. PROGRAM RUU
 - C. PROBLEM: When printing the SGLV from Inproc, user must select slave printer. This limits the user to only print to whichever printer is defined as the slave. Some users must print to the network laser.
 - D. RESOLUTION: Modified the program to allow the user to select a laser printer other than SLAVE when printing the SGLV form.
 - E. ICP: P05-A67-09-01-A
2. ECP-S/E P05-S600-002
 - A. CYCLES: None
 - B. PROGRAM RUU
 - C. PROBLEM: Unable to enter SGLI data prior to printing the DD93 for a soldier.
 - D. RESOLUTION: Allow user to enter SGLI data prior to printing the DD93 for the first time.
 - E. ICP: P05-A67-09-01-A

3.3.2 Corrector Descriptions - Functional. None.

3.3.3 Summary of Changes.

- a. Copy library member changes.
 1. Changed: None.
 2. Deleted: None.
 3. Added: None.
- b. Control library member changes.
 1. Changed: None.
 2. Deleted: None.
 3. Added: None.

3.4 Adaptation Data. This paragraph has been tailored out.

3.5 Related Documents.

3.5.1 Technical Documentation Changes. A new AIX version of Software Center Operator Manual (SCOM), AISM 25-P05-A67-AIX-SCOM dated 10 September 1998 has been issued. This current version of AISM 25-P05-A67-AIX-SCOM may be obtained from:

2

U. S. Army Information Systems Software Center
 Executive Software Systems Directorate
 Attn: AMSEL-RD-SE-IS-ESC, Stop H-6.

Fort Belvoir, VA 22060-5576.

3.5.2 Functional Manual Changes. There are no functional documentation changes for this package.

3.6 Installation Instructions.

These instructions explain how to install RUU ICP P05-A67-09-01-A onto the host computer at the installations.

Pre-Install Procedure. Before beginning to install RUU ICP P05-A67-09-01-A onto the ISM host computer, follow this procedure to make sure you have the information you will need when installing.

STEP 1. Verify Oracle. The Oracle RDBMS must reside on the host and be on-line.

Install Procedure. This procedure installs ICP P05-A67-09-01-A for RUU R9.01 AIX version 4.2 operating system baseline onto the installation server. This portion of RUU R9.01 must be installed on each server at the installation.

STEP 1. Login with the login name of "root".

STEP 2. Select a drive on the system that contains at least 300 meg of available disk space. Change directory to that drive and create a directory called "ICP.0901". Place the following files for ICP 0901 in the directory ICP.0901.

ruu_0901.cpio.Z	2873393	23 Feb 2000
install_ruu_0901	3547	23 Feb 2000
README.ruu_0901	1079	23 Feb 2000

STEP 3. Change directory to the start directory created in step 2 and type:

```
chmod 777 install_ruu_0901 <Enter>
./install_ruu_0901 <Enter>
```

STEP 4. The install_ruu_0901 will complete the following:

- a. uncompress and uncpio the ruu_0901.cpio file.
- b. change the ownership of and copy the files in this ICP into the home directory of user "ruu".

3

- c. record all output from each of the steps performed in a file named "ruu_0901.log" located in the directory specified in STEP 2.

STEP 5. Results of the installation in ruu_0901.log should be reviewed.

3.6.1 Installation Effective Date. This ICP should be immediately implemented upon receipt or NLT 30 days from date of receipt.

3.6.2 Security Implications. This paragraph has been tailored out.

3.6.3 ANSOC Installation Instructions. All users receive the same baseline with change package number through e-mail and Status Tracking and Reporting System (STARS) Bulletin Board System (BBS). This change package contains the following files:

Quantity	File ID	System	Change Package
1	ruu_0901.cpio.Z	AIX OS 4.2	P05-A67-09-01-A
install_ruu_0901			

README. ruu_0901

Ensure that all master file backups have been completed prior to loading this package.

Use these load instructions to develop load procedures that work best for your installation.

Due to various user configurations, each installation must determine appropriate block-size and library allocations.

Users must not, repeat, must not, make changes to the files.

Security impact: None.

3.6.4 Special Installation Instructions - All Users. None.

3.6.5 Point of Contact. If there are any problems or questions with the installation, or any shortage to the contents of this package, call the Army Network and Systems Operator Center (ANSOC), Ft. Huachuca: DSN 879-6798/6858 or 1-800-305-3036.

3.6.6 Report of Implementation. Implementation of this change package must be reported by completing the change package implementation form. This report must be sent to Ft. Huachuca using Fax or mail.

3.7 Possible Problems and Known Errors. This paragraph has been tailored out.
